

Designer Introduction

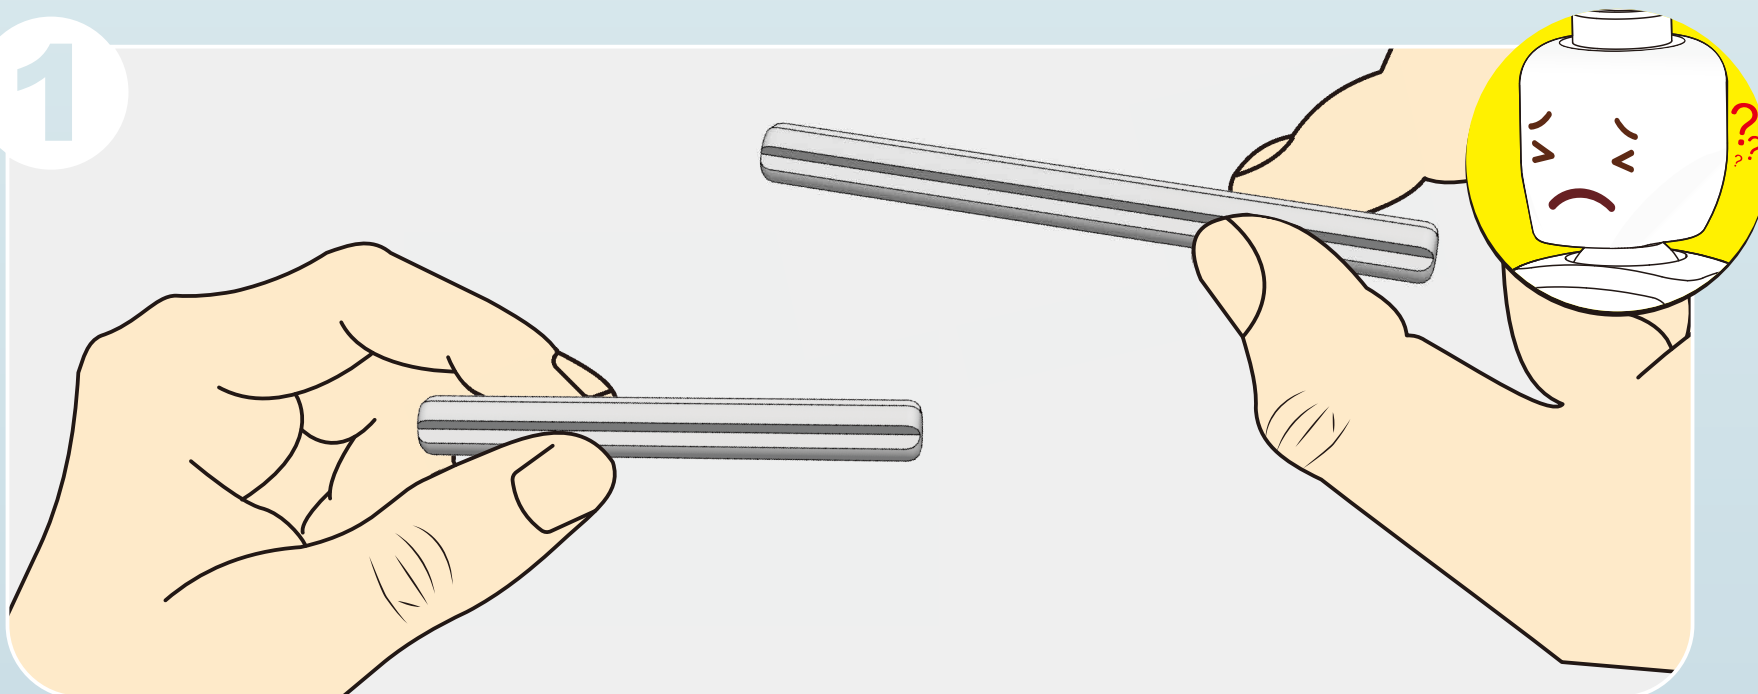

My name is Michał Skorupka (a. k. a. “Eric Trax”). I am a logistics manager in a distribution company. I have 24 years of experience in building with bricks and I specialize in agricultural machinery for the last 9 years. My specialty is building realistic agricultural machines at 1:17 scale, but I also have plenty of experience with military and off-road vehicles. I focus on combining super realistic bodies with complex internal technical mechanisms and likes to push the boundaries of size and scale, as I did with his enormous, scale-tipping Holmer Terra sugar beet harvester, Claas Lexion 760 and Claas Jaguar 900. I have also given interviews to agriculture trade magazines such as Profi.de.
